

# Metro Value Loaders

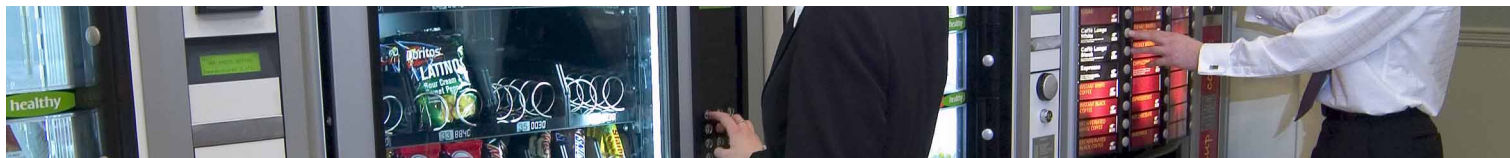

Metro value loaders provide a range of convenient cash top-up facilities for Metro cards and keys.

Metro value loaders remove cash handling from the point of sale, thus considerably reducing time and security concerns. You can choose from note and coin value loaders, note only value loaders, and/or coin only value loaders. All Metro value loader doors are securely hinged and audibly alarmed for maximum protection. Up to 4 different notes, and 5 different types of coin will be accepted. Metro value

loaders can be configured for both the U.K. and overseas markets. Inside, note cassettes and coin boxes are lockable, yet can be easily removed for cash collection purposes. Audits are retrieved by either network or handheld PDA for inclusion in Metro Manager system audits. Different types of individual loader reports can also be generated whenever required.

## Features Summary

- Euro ready
- Metro card or Metro key versions available
- Clear backlit display for personalised greetings and customer instructions
- Check balance facility always available
- Overdraft facility possible
- Easy to use
- Auditing via network or handheld PDA
