

# Metro Visitor Terminals

Metro Visitor Terminals provide 24-hour visitor card dispense/refund facilities, either with or without a general note to card loading facility.

VMC provides two types of Metro visitor terminal. Both types accept card deposits (or sales) via the insertion of up to four different types of bank note. Any excess deposit (or sales) value is automatically transferred to the card's spendable cash balance. One Metro terminal, however, can also be used for general note loading purposes, just like the Metro Note Value loader.

After a predetermined time interval, cards dispensed by a Metro visitor terminal can be returned for automatic balance/deposit refunds. These are made via two types of coin. Visitor terminal audits can be retrieved by either network, or handheld PDA, for inclusion in Metro Manager system audits. Extended individual visitor terminal reports can also be generated when required.

### Features Summary

- Euro ready
- Metro card versions available
- Clear backlit display for customer instructions
- 200 visitor card capacity
- Graphic instruction panel
- Easy to use
- Auditing via network or handheld PDA
- Retains details about the last 2000 transactions
- Door alarm and door entry log feature

### Components / Ratings

- Integral power supply (single phase 90 – 270v ac) with 3A fuse
- EVA (CVS) complaint card/key reader incorporating 4 x 20 alpha numeric LCD display
- Exchangeable SAM card module for plug and play support configuration

### Physical

- Cabinet Powder coated mild steel (Grey RAL 7036)
